

## Case Study: Bridge Link. Location: Muiravonside.

### Brief

IKM were instructed to design a new path and a bridge connecting The River Avon Heritage Trail with the Union Canal. The aim was to provide an important link towards a future cross-Scotland walk.

### Solution

IKM designed a dynamic, elevated structure using natural materials. The bridge was designed to enhance the experience of walking through the park whilst making the river crossing safe.

### Outcome

The completed project received commendation in the Scottish Enterprise Dynamic Place Awards 2002.

Team: Central Scotland Countryside Trust with IKM Consulting and David Jenkins associates.  
Client: Falkirk Council.
